

Reception			
Objective: Number	Concrete	Pictorial	Abstract
Match and sort			$5 + 2 = 7$
Compare amounts	Use toys and general classroom resources for children to physically manipulate, group/regroup.		
Representing, comparing, composition of numbers 1-10 (completed in phases throughout the year)	 Use specific maths resources such as counters, cubes, Numicon etc.	Two groups of pictures so children are able to count the total.	A focus on symbols and numbers to form a calculation. No expectation for children to be able to record a number sentence/addition calculation.
One more			
Introducing zero			
Bonds to 10		Bar model using visuals, pictures/icons or colours.	

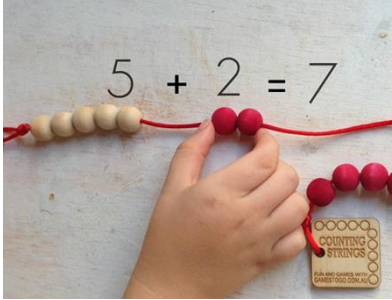

<p>Building numbers beyond 10</p>	<p>Use visual supports such as ten frames, part part whole and addition mats, with the physical objects and resources that can be manipulated.</p>		
<p>Adding more</p>	<p>Visual timetable</p>		
<p>Even and odd</p>	<p>Noticing and subitising- what do you see? How can you see it? Move it to prove it</p>	 <p>Use visual supports such as ten frames, part part whole and addition mats with pictures/icons.</p>	

Year 1			
Objective / strategy	Concrete	Pictorial	Abstract
Combining two parts to make a part, part, whole model.	 <p>Use cubes, Base ten, tens frames or bead string to add two numbers together as a group or in a bar.</p>	 <p>$3 + 4 = ?$</p> <p>$3 + 4 = 7$</p> <p>Use pictures to add two numbers together as a group or in a bar.</p>	<div style="border: 1px solid black; border-radius: 10px; padding: 10px; text-align: center; font-size: 24px; font-weight: bold;"> $4 + 3 = 7$ </div> <p>Once children have become secure in using the part-part whole model move to the abstract.</p>

Calculation policy

Addition

<p>Addition by starting at the bigger number and counting on in ones.</p>	 <p>Starting with the larger number and then counting on to the smaller number 1 by 1 to find the answer. This can be done with cubes, counter or bead strings.</p>	 <p>Start at the larger number on the number line and count on in ones. As this skill develops children should be able to do this in one jump.</p>	<p>$5 + 12 = 17$ So $12 + 5 = 17$</p> <p>Place the larger number in your head and count on the smaller number to find your answer.</p>
<p>Regrouping to make 10. This is an essential skill for column addition later.</p>	 <p>Start with the bigger number and use the smaller number to make 10.</p>	<p>If children are able to regroup to make ten using concrete and pictorial then move to the abstract.</p>	 <p>Using pictures or a number line. Regroup or partition the smaller number using the part, part, whole model to make 10. Use partitioning to complete write calculation.</p>

<p>Represent through imagery & use number bonds within numbers to 20. Also use subtraction facts.</p>			<p>Emphasis should be on the language: <i>'1 more than 5 is equal to 6.'</i> <i>'2 more than 5 is 7.'</i> <i>'8 is 3 more than 5.'</i></p>
---	---	---	---

Key questions and vocabulary

+, add, more, plus, make, sum, total, altogether, double, one more, two more, ten more, regrouping, number bonds, tens, ones, tens frame.

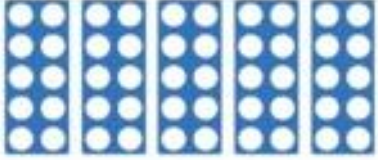

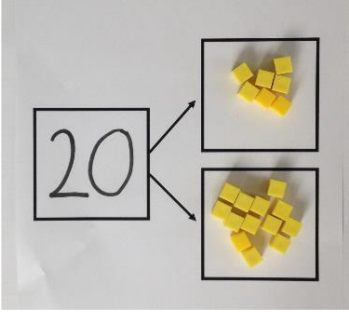

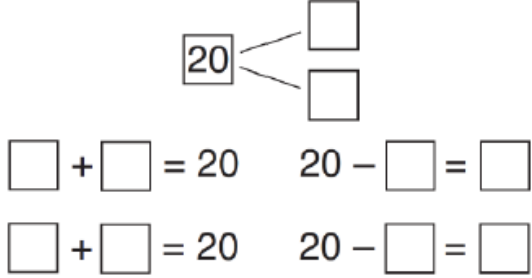

How many more to make...?

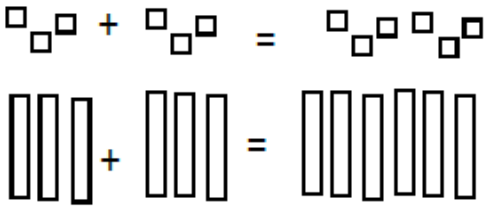

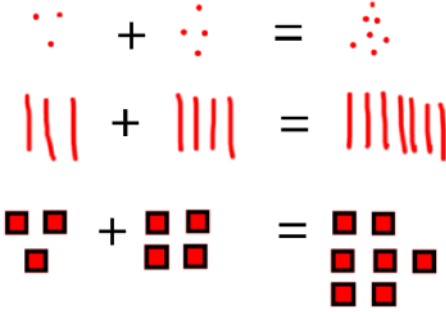

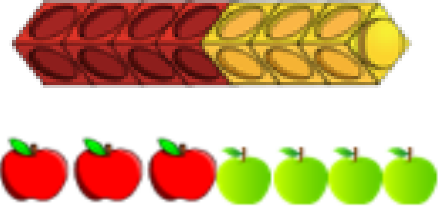

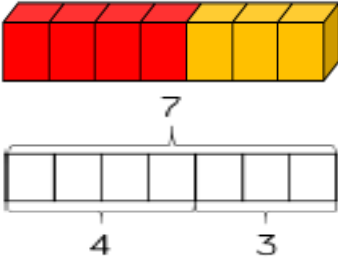

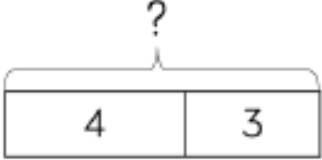

How many more is... than...?

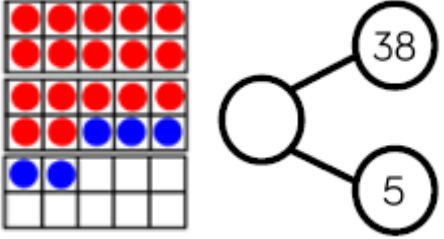

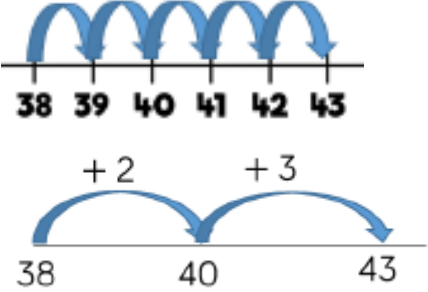

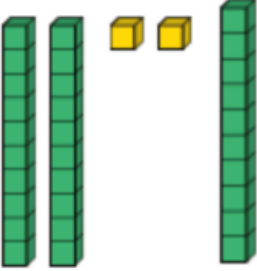

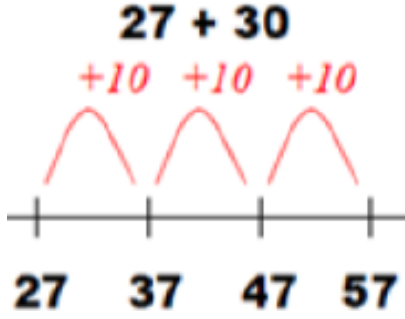

How much more is...?

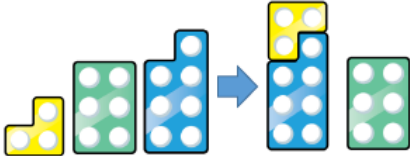

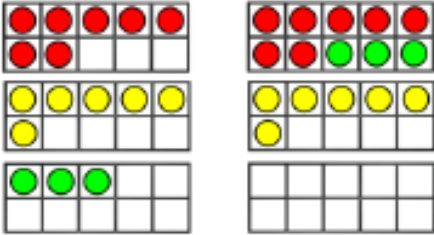

Year 2

Objective / strategy	Concrete	Pictorial	Abstract
----------------------	----------	-----------	----------

<p>Adding multiples of 10</p>	 <p>Children to explore adding doubles of 10 using a range of resources. This could include numicon or bead strings.</p>	 <p>3 tens + 5 tens = <input type="text"/> tens 30+50=<input type="text"/></p> <p>Using representations for base 10.</p>	<p>20+30=50 50=30+20 30+<input type="text"/>=50</p>
<p>Use known fact's part, part, whole model.</p>	 <p>Children explore ways of making numbers within 20.</p>	 <p><input type="text"/> + <input type="text"/> = 20 20 - <input type="text"/> = <input type="text"/> <input type="text"/> + <input type="text"/> = 20 20 - <input type="text"/> = <input type="text"/></p>	<p><input type="text"/> + 1 = 16 16 - 1 = <input type="text"/> 1 + <input type="text"/> = 16 16 - <input type="text"/> = 1</p>

<p>Using known facts</p>	 <p>Use known facts from to support addition on two-digit numbers.</p>	 <p>Children draw representations of H, T and Os</p>	$3 + 4 = 7$ $30 + 40 = 70$ $300 + 400 = 700$
<p>Bar model</p>	 <p>Cubes and objects can be used in a line as a concrete representation of the bar model.</p>	 <p>Discrete bar models are a good starting point with smaller numbers. Each box represents one whole.</p>	 <p>Continuous bar models are useful for a range of values. Each rectangle represents a number. The question mark indicates the value to be found.</p>

<p>Adding 1-digit and 2-digit numbers to 100.</p>	 <p>Exploring patterns within numbers and partitioning to find the next ten.</p>	 <p>Children to first add 1-digit at a time on a number line. Then move to partitioning and jumping to the next ten.</p>	<div style="border: 1px solid black; border-radius: 10px; padding: 5px; text-align: center; font-size: 1.2em; font-weight: bold;"> $38 + 5 = 43$ </div> <p>Explore relative facts:</p> <p>$38 + 5 = 43$ $5 + 38 = 43$ $43 - 5 = 38$ $43 - 38 = 5$</p>
<p>Add a 2 digit number and a 10</p>	 <p>$23 + 10 = 33$ Explore the concept that the 1 digit does not change.</p>	 <p>Use part, part, whole and number line to model.</p>	<p>$27 + 30 = 57$</p> <p>Children to record the addition problem in a number sentence.</p> <p>Explore relative facts:</p> <p>$27 + 10 = 37$ $27 + 20 = 47$ $27 + ? = 57$</p>

<p>Add 3 1-digit numbers</p>	 <p>Combine to make 10 first if possible before adding the third digit.</p>	 <p>Regroup and draw representations.</p>	<div style="border: 1px solid black; border-radius: 10px; padding: 5px; display: inline-block; margin-bottom: 10px;"> $7 + 6 + 3 = 16$ </div> $7 + 6 + 3 = 16$  <p>Combine the two numbers that make ten then add on the third.</p>
------------------------------	--	--	---

Key questions and vocabulary

+, add, **addition**, more, plus, make, sum, total, altogether, score, double, near double, one more, two more... ten more... **one hundred more**

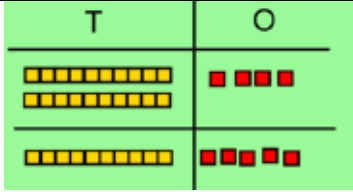

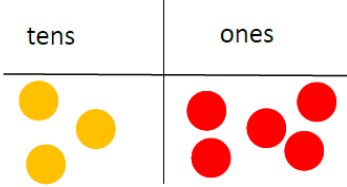

Regrouping

how many more to make...?

how many more is... than...?

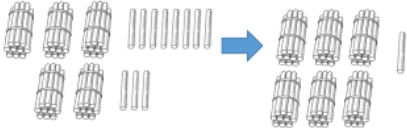

how much more is...?

Year 3			
Objective / strategy	Concrete	Pictorial	Abstract
<p>Column Addition: no regrouping and using friendly numbers)</p> <p>Add two or three 2 or 3-digit numbers.</p>	 <p>$24 + 15 =$</p> <p>Add together the ones first, then the tens. Model using Base 10 or Numicon. Move to using place value counters.</p>	 <p>$21 + 14 =$</p> <p>Children move to drawing the counters using a tens and one frame.</p>	<p>Expanded column addition</p> $\begin{array}{r} 243 = 200 + 40 + 3 \\ +435 = 400 + 30 + 5 \\ \hline 678 = 600 + 70 + 8 \end{array}$ <p>Then look at expanded method when the ones will change the value of the tens- introduction to regrouping.</p> $\begin{array}{r} 67 = 60 + 7 \\ +24 = 20 + 4 \\ \hline 91 = 80 + 11 \end{array}$ <p>End point is for children to be confident for addition without the expanded method.</p>

			$\begin{array}{r} 223 \\ + 114 \\ \hline 337 \end{array}$														
<p>Column addition with regrouping.</p>	 <p>38 + 23 = 61</p> <p>Exchange ten ones for a ten.</p> <table border="1" data-bbox="394 852 732 1075"> <thead> <tr> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td>10 10 10</td> <td>1 1 1 1</td> </tr> <tr> <td>10 10</td> <td>1 1 1</td> </tr> <tr> <td>10</td> <td></td> </tr> </tbody> </table> <p>Discussing regrouping using objects. Then model using counters or Base 10.</p>	Tens	Ones	10 10 10	1 1 1 1	10 10	1 1 1	10		<table border="1" data-bbox="1023 580 1400 842"> <thead> <tr> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> </tbody> </table> <p>Children to draw a representation of the grid to further support their understanding, carrying the ten underneath the line.</p>	Tens	Ones					<p>Start by partitioning the numbers before formal column addition. This helps to embed the idea of exchanging.</p> $\begin{array}{r} 38 \\ + 23 \\ \hline 61 \\ \hline 1 \end{array}$
Tens	Ones																
10 10 10	1 1 1 1

		1	1																														
<p>Children continue to use Base 10 or place value counters to add, exchanging ten ones for a ten and ten tens for a hundred and ten hundreds for a thousand.</p>																																	

Key vocabulary and questions
 add, addition, more, plus, increase, sum, total, altogether, score, double, near double, exchanging, carrying
 how many more to make...?

Calculation policy

Addition

Objective / strategy	Concrete	Pictorial	Abstract																																										
Add numbers with more than 4-digits.	<p>Place value counters or plain counters on a place value grid are the most effective concrete resource when adding numbers with more than 4 digits.</p> 		<p>At this stage children should be encouraged to work in the abstract, using the column method to add larger numbers efficiently.</p> <table border="1" data-bbox="1619 520 1964 670"> <tr><td>1</td><td>0</td><td>4</td><td>3</td><td>2</td><td>8</td></tr> <tr><td>+</td><td>6</td><td>1</td><td>7</td><td>3</td><td>1</td></tr> <tr><td colspan="6"><hr/></td></tr> <tr><td>1</td><td>6</td><td>6</td><td>0</td><td>5</td><td>9</td></tr> </table>	1	0	4	3	2	8	+	6	1	7	3	1	<hr/>						1	6	6	0	5	9																		
1	0	4	3	2	8																																								
+	6	1	7	3	1																																								
<hr/>																																													
1	6	6	0	5	9																																								
Add decimals with 2 decimal places, including money.	<p>Introduce decimal place value counters and model exchange for addition.</p> 		<table style="margin-left: auto; margin-right: auto;"> <tr><td colspan="6"><hr/></td></tr> <tr><td>3</td><td>.</td><td>6</td><td>5</td><td colspan="2"></td></tr> <tr><td>+</td><td>2</td><td>.</td><td>4</td><td>1</td><td></td></tr> <tr><td colspan="6"><hr/></td></tr> <tr><td>6</td><td>.</td><td>0</td><td>6</td><td colspan="2"></td></tr> <tr><td colspan="6"><hr/></td></tr> <tr><td>1</td><td colspan="5"></td></tr> </table>	<hr/>						3	.	6	5			+	2	.	4	1		<hr/>						6	.	0	6			<hr/>						1
